Video Surveillance| Fleet Operators

Deploying Video surveillance in the moving vehicles is challenging task due to various constraints arising in the vehicle. Xeonix has come up with a ruggedized solution for deploying both Analog and IP based camera solutions. With the delayed and additional battery back our DVR/NVR system is now easy to deploy and manage it.

Xeonix Mobile video surveillance solutions can be deployed for various applications area. A few are given below.

➢ School Buses: School management or transportation department personnel's can understand the behavior of students / driver / support staff and incidents taken place inside the bus for investigation. The cameras also captures parents/guardians who came to pick up and drop their wards from the bus stop.

➢ Omni Buses/ Cabs: Most of the offices buses and cabs are misused by the drivers to drop and pickup public people after the end points are completed. Working ladies especially in the night shift have more concern on the behaviors of the driver and co-workers travelling. Any misbehavior with the ladies is helpful in taking appropriate action for authorities.

➢ Cash Delivery Vans: Used by banks and other agencies for cash delivery to Banks / ATM's.

Benifits

➢ Protects School Children/Employees.
➢ Remote monitoring
➢ Captures Accidents
➢ Evidence in solving crimes

Salient Features

➢ Pluggable SATA HDD/SSD
➢ 3G module , GPS module
➢ Ruggedized enclosure to withstand vibration.
➢ Power-off protection & RPS
➢ H.264 Video compression
➢ VMS Software

Public safety in transportation Buses, Schools Buses, cabs are becoming very crucial for government authorities and fleet operators to address safety of their employees / students / passengers due to the rising crimes in rent years.   The combination of CCTV cameras & DVR offer a proven solution in combatting the problems of vandalism, anti-social behavior, false insurance claims and theft. All of which are increasing problems for coach, bus and commercial vehicle operators.

Xeonix Technologies Private Limited., specializes in delivering wide range of solutions and services in Video Surveillance & Wireless Data communication for various industry verticals. Strength of XeoniX lies in experienced team and its promoters who has decades of experience in IT industry.
